

An illustration of a street scene at night. On the left, a bird is perched on top of a streetlight. Below it, three more streetlights are shown, each casting a glow on the ground. The background is a dark, hazy landscape with silhouettes of hills or mountains.

Street light reporting in Albuquerque

As of Dec. 1, the City of Albuquerque contracted with Citelum to help maintain the city-owned streetlights within Albuquerque as part of the city's project to upgrade all city owned lights to LED. Citelum will be managing all city owned streetlights going forward, and will record and track all city owned streetlight outages. These lights will be Citelum's responsibility to fix and maintain. PNM will still be responsible for PNM owned lights so please continue reporting streetlight outages to **888-DIAL-PNM**. If it's determined that the streetlight in question is city owned, your call may be forwarded to Citelum to report the outage.
